RWCLL Umpire Management

Test Day: a day in the life of the tool

A minimum-capabilities test, run live by several people on a video call, on the TEST database, in TWO SESSIONS (they can also be run back to back). This is the MASTER SCRIPT for the facilitator: every step, who does it, what to expect, and the database checks. Each person also has their own sheet with only their steps.

Session 1 date: _____ Session 2 date: _____ Facilitator: _____

The plan at a glance

Phase	What happens	Minutes
Session 1: Setting up (about 65 minutes)		
Phase 0: Before we start	Facilitator only, then everyone signs in and checks their screen.	15
Phase 1: New people join	A new umpire signs up and a waiting parent is approved and linked to a child.	15
Phase 2: Building the schedule	Assign umpires to Saturday Nov 14, confirm, take a game, set availability.	20
Phase 3: A younger umpire needs a parent's consent	Sam Young is 11. The system must refuse until his mother consents.	15
Session 2: Game day and after (about 125 minutes)		
Phase 4: The day before (pretend Friday Nov 13)	Reminders go out, and parents are copied.	25
Phase 5: Game day (pretend Saturday Nov 14)	Check-in, running late, a no-show, a replacement, notes, and a rainout.	30
Phase 6: After the games	Reports.	10
Phase 7: Payroll (no real money)	Earnings from last month's real seeded games, a payroll, approval, and recording a payment.	25
Phase 8: Families, later	Consent withdrawn, and a youth turning 18.	15
Phase 9: Things that must NOT work	Each person tries to open a page they should not be able to.	10
Phase 10: Wrap-up	Everyone writes down what they thought.	10

Rules of the day

- This is a test of the APP, not of you. If something is confusing, that IS the finding: write it down.
- Use your own device (a phone if you can). If you play two people, use two browser windows, one of them private, and keep their pretend clocks separate.
- Do only what your sheet says, when your cue arrives. The facilitator announces each phase on the call.
- Stuck for 3 minutes? Write down the step number and what you saw, tell the facilitator, and move on.
- Do NOT fix or change anything your sheet does not ask for.
- Everything runs on the TEST database. All emails go only to the facilitator's inbox, marked [TEST for ...]. No real person receives anything, and no money moves.
- Tick Pass or Fail for every step. The words on the screen may differ slightly from the sheet: that is fine, but note if a button was hard to find.
- Pretend time (the bar at the top of the page) only changes YOUR browser. Press Use real time when a phase says so.
- A star after a step number (for example 3.1 ★) marks a MUST-PASS step: the minimum the app has to do.

Good to know (read this one aloud)

- Pretend time changes what the screens, check-in and notes see. A few database rules (such as the date limit when the treasurer works out earnings) use the real date, which is why Phase 7 uses last month's real seeded games.
- The app sends email about every 5 minutes by itself. During the test the facilitator runs the sender by hand, so messages arrive when announced.
- The sign-up email in step 1.1 is the real sign-up system (it goes to a real address), unlike every other message.
- Stripe (real payments) is not built yet. Step 7.11 is a placeholder where your opinion is the result.
- The consent wording is DEMO wording. The real wording will come from the board.
- Written on the sheets: logins and the shared test password. These accounts exist only on the TEST database.

Running it in two sessions

- Session 1 sets things up (about 65 minutes). Session 2 is the game day and everything after it (about 2 hours). The Treasurer can skip Session 1.
- Back to back: take a 10-minute break between the sessions. Everyone stays signed in; the facilitator still runs the Session 2 starting check (step 4.0a).
- On different days: do NOT run the cleanup script in between. The database keeps Session 1's results (the new umpire, Rita Miller linked to Oliver, Liam's and Michael's games, Sam Young's consent), and Session 2 depends on them.
- Email stays in safe mode between sessions. If it was switched off, repeat step 0.3 before Session 2.
- Before Session 2 the facilitator runs the check in step 4.0a. If a row is wrong, a Session 1 step did not happen: do it by hand (it is on the sheet of the person named), then run the check again.
- Pretend time lives in each person's own browser. Everyone sets it again when Session 2 says so.
- Each person's sheet has a separate Notes and problems page for each session.
- Who needs to come: Session 1: A, B, C, E, F, G (the Treasurer, D, is optional). Session 2: everyone.

The cast and their logins

Seven roles. Each person signs in with the login on their row. (All of these accounts exist only on the TEST database.)

	Role	Login (email)	Password	Tabs you should see	Played by
A	**Super Admin, Facilitator and Database Checker**	erik@rwcll.org	erikRWCLL111	Administration, Games, Field board, Reports, Families, Payments	
B	**Umpire Chief**	erik+umpchief@rwcll.org	erik+umpchief111	Umpire Management, Games, Field board, Reports, Families	
C	**Scheduler**	erik+scheduler@rwcll.org	erik+scheduler111	Umpires, Games, Field board, League Setup, My details	
D	**Treasurer**	erik+treasurer@rwcll.org	erik+treasurer111	Payments, My details	
E	**Adult Umpire (Michael Chang)**	adult.ump5@rwcll.test	umpire111	Home, My details	
F	**Youth Umpire (Liam Smith, age 14)**	youth.ump1@rwcll.test	umpire111	Home, My details	
G	**Parent (Maria Smith)**	parent1@rwcll.test	umpire111	My family, My details	

If you have fewer than seven people

Seven people	One person for each role A to G.
Six people	A, B, C and D together as C+D (they rarely act at the same moment), then E, F and G separately: A, B, C+D, E, F, G.
Five people	A; B+C; D+E; F; G. The person with two roles uses two browser windows (one private) and keeps the two pretend clocks separate.

Before each session: every person needs their sheet (or this master), a phone or computer, and the TEST site address. The facilitator needs database access and the PowerShell command to run the sender.

The must-pass steps

Steps marked with a star are the minimum capabilities. If any of these fails, the app is not ready for real people yet.

Step	Who	What it proves
0.2 ★	A	Every row shows n equal to expected. If any row is wrong, run testday_cleanup.sql (TEST only), then run this check again.
0.3 ★	A	The result shows four rows: app_url (the site address), email_mode = safe, email_safe_allowlist = empty, email_safe_redirect = your address. From...
0.6 ★	ALL	You land signed in and the tabs match the list on your sheet. Sign out works. Write down anything odd, such as slow loading or a layout that does...
1.1 ★	E	A message says your registration was submitted, and to check your email. (This email comes from the real sign-up system, not from the test mailbox.)
1.3 ★	B	A message says it was approved, and the registration leaves the list.
1.5 ★	B	It says she says she is the parent of 'Mother of Oliver Miller (Seniors)'. After Approve: Approved Rita Miller as a parent or guardian. Link them...
1.6 ★	B	Linked to Oliver Miller. His card now shows Rita Miller (Mother). Oliver leaves the Needs attention list. Elijah Davis is still listed (no parent...
2.4 ★	C	The game now shows Liam Smith and is no longer OPEN. If the screen shows eligibility notes for youth, Liam is allowed (he is 14).
2.6 ★	F	You see Saturday, 9:00 AM, A-Yankees vs A-Dodgers at Roy Cloud Elementary, marked Assigned. After Confirm it says Confirmed.
3.1 ★	C	The system REFUSES with a message like: That umpire is under 13 and needs a parent or guardian's consent before they can be assigned. The game is...
3.3 ★	G	You see Liam (age 14, Active, with his Nov 14 game) and Sam Young (age 11, Waiting for consent). The wording says it is DEMO wording for testing....
3.4 ★	C	It now works. The game shows Sam Young.
4.0a ★	A	Every row shows n equal to expected: Liam and Michael assigned, Sam Young's consent and assignment, Rita Miller linked, the new Test umpire...
4.2 ★	A	It returns 15. If you run it a second time it returns 0 (nobody is reminded twice).
4.3 ★	A	'Reminder: you umpire tomorrow' for Liam and Michael Chang, and 'Copy for ...' reminders for the parents of the youth umpires. Michael's 12:30 PM...
5.1 ★	F	There is NO I'm here button yet (check-in opens one hour before the game, at 8:00 AM).
5.4 ★	F	Your game shows that you arrived at about 8:50, on time.
5.6 ★	E	The game is no longer yours (it shows as declined) and your 12:30 PM and 5:00 PM games are still yours.
5.7 ★	B	The call-around list shows umpires with their phone numbers and marks the busy ones. After Assign, the game shows William Anderson.
5.10 ★	F	You can see the first note (parking). You must NOT see the second one (administrators only).
5.11 ★	C	The list shows ONE game: 11:00 AM A-Mets vs A-Phillies (Sam Young's game). After you confirm, that game shows as canceled and the field shows...
5.16 ★	A	Arrivals: Liam about 8:50, William about 9:12 (late), Michael about 12:20. Two notes (one admin only). One running-late report. The closure shows...
6.2 ★	B	You can read it, with Liam Smith as the author, and your follow-up is saved.
7.2 ★	D	Added 127 earnings ($5,475.00). 97 recorded arrivals earned nothing because that place has no pay rate (adults and the bases). The list shows the...
7.4 ★	D	A draft appears with Total $5,479.50, a payment for each family, and a red warning: 2 umpires have no payee yet: Elijah Davis ($300.00) and Oliver...
7.5 ★	D	It is REFUSED: Could not approve. These umpires have no payee yet: Elijah Davis, Oliver Miller. The payroll stays a draft.

Step	Who	What it proves
7.7 ★	D	Approved: waiting to be paid. The payments list shows 10 families: Maria Smith $244.50, Dana Johnson $450.00, Chris Brown $875.00, Rosa Garcia...
7.8 ★	D	Maria Smith's line says Paid by check (TEST-1001). The other lines still say pending, and the payroll still says Approved: waiting to be paid.
7.9 ★	G	Paid to you so far: $244.50 and a line Paid by check. Liam's earnings are listed. (His individual lines may still say 'Approved: payment coming'...
7.12 ★	A	127 earnings = $5,475.00. The payroll is approved. Payroll total = payments total = items total = $5,479.50, and lines_without_payee = 0. The...
8.2 ★	C	REFUSED again with the consent message.
8.4 ★	A	The job returns 1 (Casey Turner). (If it says more than 1, a seed umpire had already turned 18: look at the family log.)
8.6 ★	A	THREE messages: to Casey's mother (Pat Nguyen, parent6@rwcll.test): Casey Turner is now an adult umpire (she will no longer be copied, payments go...
9.1 ★	F	You do NOT get a Payments, Reports or Families page. You stay on your own pages.
9.2 ★	E	None of them shows a page.
9.3 ★	G	None shows a page. My family shows only Liam and Sam Young: no other family's child.
9.4 ★	C	Neither shows a page. You have no Reports or Payments tab.
9.5 ★	B	It does not show a page. You have no Payments tab.
9.6 ★	D	None of them shows a page. You only have Payments and My details.

The script, Session 1

Who: A Super Admin and Facilitator, B Umpire Chief, C Scheduler, D Treasurer, E Adult Umpire, F Youth Umpire, G Parent, ALL everyone.

Session 1: Setting up

Get everyone signed in, add a new umpire, link a parent, build Saturday's schedule, and handle the younger umpire who needs consent. About 65 minutes. The Treasurer can skip this session.

#	Who	Where	What to do	What you should see	Result	Notes
Phase 0: Before we start Facilitator only, then everyone signs in and checks their screen. About 15 minutes.						
0.1	**A**	Supabase SQL Editor (TEST project)	*Cue: Before anyone joins the call* If the TEST database has not had the newest seed.sql run on it, run it now. Then run the first check below.	seed.sql finishes with no error. Its last result lists every account as OK, EXCEPT Rita Miller (parent5@rwcll.test), who shows PROBLEM: profile not approved: that is expected, she is the waiting registration. The check shows 41 accounts and demo_clock_allowed = true.	[ ] Pass [ ] Fail	

DB	**DATABASE CHECK (read-only). Section 0.1 of testday_db_checks.sql. Select the query and press Run.**
	`-- accounts exist`
	`select count(*) as accounts, 41 as expected`
	`from auth.users where email like '%@rwcll.test';  -- 30 umpires + 10 parents + Casey Turner`
	
	`select value as demo_clock_allowed from public.app_settings where key = 'demo_clock_allowed';  -- true`					

0.2 ★	**A**	Supabase SQL Editor (TEST project)	*Cue: After 0.1* Run the starting-state check below.	Every row shows n equal to expected. If any row is wrong, run testday_cleanup.sql (TEST only), then run this check again.	[ ] Pass [ ] Fail	

DB	**DATABASE CHECK (read-only). Section 0.2 of testday_db_checks.sql. Select the query and press Run.**
	`-- starting state (every row: n should equal expected)`
	`select 'games on Nov 14' as what, count(*) as n, 24 as expected`
	`from public.games where (starts_at at time zone 'America/Los_Angeles')::date = '2026-11-14'`
	`union all select 'assignments on Nov 14', count(*), 17`
	`from public.game_assignments a join public.games g on g.id = a.game_id`
	`where (g.starts_at at time zone 'America/Los_Angeles')::date = '2026-11-14'`
	`union all select 'youth pay rates (6 divisions x plate and field)', count(*), 12 from public.pay_rates r where r.classification = 'youth' and r.position in ('plate', 'field') and r.effective_on = '2026-09-12'`
	`union all select 'adult pay rates', count(*), 0 from public.pay_rates r where r.classification = 'adult'`
	`union all select 'earnings', count(*), 0 from public.earnings`
	`union all select 'payrolls', count(*), 0 from public.payrolls`
	`union all select 'queued or sent emails', count(*), 0 from public.email_outbox`
	`union all select 'consents', count(*), 0 from public.parental_consents`
	`union all select 'waiting parent registrations (Rita Miller)', count(*), 1`
	`from public.profiles where registration_kind = 'parent_guardian' and account_status = 'pending'`
	`union all select 'Sam Young linked to Maria Smith', count(*), 1`
	`from public.family_links l join public.umpires u on u.id = l.umpire_id join public.profiles p on p.id = l.parent_id`
	`where u.display_name = 'Sam Young' and p.display_name = 'Maria Smith' and l.ended_at is null`
	`union all select 'Casey Turner is a youth', count(*), 1`
	`from public.umpires where display_name = 'Casey Turner' and classification = 'youth';`
	`-- If any row is wrong, run testday_cleanup.sql and then this check again.`					

#	Who	Where	What to do	What you should see	Result	Notes
0.3 ★	**A**	Supabase SQL Editor (TEST project)	*Cue: After 0.2* Switch email to SAFE mode, so that every test email goes to ONE inbox that you read. This changes settings (TEST only). In the Supabase SQL Editor paste the block below, then change ONE thing: replace PUT-YOUR-REAL-EMAIL-HERE with the address where you want to read the test emails (your everyday inbox). Press Run. That is all: it is a single block. (It is section 0.3 of testday_actions.sql: copy from its heading line down to the line before the 4.2 heading.)	The result shows four rows: app_url (the site address), email_mode = safe, email_safe_allowlist = empty, email_safe_redirect = your address. From now on no message can reach a real person: all of it arrives at your address marked [TEST for ...].	[ ] Pass [ ] Fail	

DB	**ACTION: THIS CHANGES DATA. It is section 0.3 of testday_actions.sql: run only this section, only at this step.**
	`-- ACTION: email safe mode (one block: change PUT-YOUR-REAL-EMAIL-HERE to the inbox you read, then run the whole block)`
	`update public.sending_settings set value = 'safe' where key = 'email_mode';`
	`update public.sending_settings set value = 'PUT-YOUR-REAL-EMAIL-HERE' where key = 'email_safe_redirect';`
	`update public.sending_settings set value = 'https://rwclldb.github.io/rwcll-umpire-scheduler/' where key = 'app_url';`
	`-- clear the safe list, so that NOBODY receives their own messages: every message goes to the redirect address only`
	`-- (you can put your addresses back in email_safe_allowlist after the test)`
	`update public.sending_settings set value = '' where key = 'email_safe_allowlist';`
	`select key, value from public.sending_settings where key in ('email_mode', 'email_safe_redirect', 'email_safe_allowlist', 'app_url') order by key;`
	`-- email_mode must say safe, the redirect must be YOUR address, and email_safe_allowlist must be empty.`
	`-- Every message goes to the redirect address, marked [TEST for ...].`				

0.4	**A**	The app: Administration, then Outbox	*Cue: After 0.3* Press Send me a test message. Then run the sender once from PowerShell (the Invoke-RestMethod command in EMAIL-SENDING.md, Part 3, step 2).	The Outbox banner says SAFE MODE. A test email marked [TEST for ...] arrives within a minute at the address you chose in 0.3 (check spam too), and the Outbox shows it as Sent.	[ ] Pass [ ] Fail	
0.5	**A**	Video call	*Cue: When everyone has joined* Welcome everyone and read out the Rules of the day (page 1 of every sheet). Share your screen with your inbox open, so everyone can see the emails as they arrive.	Everyone knows: write down anything confusing, move on after 3 minutes if stuck, do not fix anything, and wait for the call before starting a new phase.	[ ] Pass [ ] Fail	
0.6 ★	**ALL**	Your own device (a phone if you can)	*Cue: After 0.5* Open the TEST site address from the facilitator. Sign in with the login on your cast sheet. Look at the tabs across the top. Press Sign out, then sign in again.	You land signed in and the tabs match the list on your sheet. Sign out works. Write down anything odd, such as slow loading or a layout that does not fit your phone.	[ ] Pass [ ] Fail	
0.7	**ALL**	Top of the page: the Pretend time bar	*Cue: After 0.6* Press Set pretend time, pick any date and time, press Set. Then press Use real time.	A bar says Pretend time: (the time you chose) (not real). After Use real time it goes away. (Pretend time only affects your own browser.)	[ ] Pass [ ] Fail	

Phase 1: New people join

A new umpire signs up and a waiting parent is approved and linked to a child. About 15 minutes.

#	Who	Where	What to do	What you should see	Result	Notes
1.1 ★	**E**	Sign-in page, then Create account	*Cue: Phase 1 begins* Sign up as a NEW adult umpire using YOUR OWN real email address. Use the name Test followed by your first name. Choose Adult umpire. Make up a password.	A message says your registration was submitted, and to check your email. (This email comes from the real sign-up system, not from the test mailbox.)	[ ] Pass [ ] Fail	
1.2	**E**	Your email inbox, then the app	*Cue: After 1.1* Open the confirmation email and press its link. Sign in with your new account. If the app asks for your details (name, phone, birth date), fill them in and save.	You are signed in and the app says Awaiting approval (or asks for your details first, then says Awaiting approval).	[ ] Pass [ ] Fail	
1.3 ★	**B**	Umpire Management, then Approvals	*Cue: After E says 'I am waiting for approval' (1.2)* Find the waiting registration for Test (E's name). Choose Adult, enter any adult birth date (for example 1985-05-05), and press Approve.	A message says it was approved, and the registration leaves the list.	[ ] Pass [ ] Fail	
1.4	**E**	The app	*Cue: After 1.3* Reload the page, or sign out and in.	You now see Home with Welcome and your name, and a My schedule section that says you have no games.	[ ] Pass [ ] Fail	
1.5 ★	**B**	Umpire Management, then Approvals, then Parent and guardian registrations	*Cue: After 1.3* Find Rita Miller. Read what she wrote about herself. Press Approve.	It says she says she is the parent of 'Mother of Oliver Miller (Seniors)'. After Approve: Approved Rita Miller as a parent or guardian. Link them to their child in Families.	[ ] Pass [ ] Fail	
1.6 ★	**B**	Families	*Cue: After 1.5* In the Needs attention list find Oliver Miller (no parent linked). On his card choose Rita Miller in the dropdown, leave Mother, and press Link.	Linked to Oliver Miller. His card now shows Rita Miller (Mother). Oliver leaves the Needs attention list. Elijah Davis is still listed (no parent linked): that is expected.	[ ] Pass [ ] Fail	
1.7	**A**	Supabase SQL Editor	*Cue: After 1.6* Run the check below.	The new Test umpire is approved with the adult_umpire role. Rita Miller is approved with parent_guardian. Oliver Miller has one active parent link: Rita Miller.	[ ] Pass [ ] Fail	

DB	**DATABASE CHECK (read-only). Section 1.7 of testday_db_checks.sql. Select the query and press Run.**
	`-- the new people`
	`select p.display_name, p.email, p.account_status, string_agg(ur.role_id, ', ') as roles`
	`from public.profiles p left join public.user_roles ur on ur.user_id = p.id`
	`where p.display_name like 'Test %' or p.display_name = 'Rita Miller'`
	`group by p.display_name, p.email, p.account_status order by 1;`
	`-- The new umpire (named "Test ..."): approved, with the adult_umpire role.  Rita Miller: approved, parent_guardian.`
	
	`select u.display_name as child, p.display_name as parent, l.relationship, l.created_by_name`
	`from public.family_links l join public.umpires u on u.id = l.umpire_id join public.profiles p on p.id = l.parent_id`
	`where u.display_name = 'Oliver Miller' and l.ended_at is null;`
	`-- One row: Oliver Miller / Rita Miller / mother, made by the person who linked her.`				

Phase 2: Building the schedule

Assign umpires to Saturday Nov 14, confirm, take a game, set availability. About 20 minutes.

#	Who	Where	What to do	What you should see	Result	Notes
2.1	**C**	League Setup	*Cue: Phase 2 begins* Look at the season and the divisions. Do not change anything.	You see Fall 2026 and the divisions A, AA, AAA, Majors, Juniors and Seniors, and a list of fields.	[ ] Pass [ ] Fail	
2.2	**C**	Games	*Cue: After 2.1* Set From to 2026-11-14 and look at Saturday Nov 14.	24 games on Nov 14 (the last ones start in the afternoon). Many show OPEN in the Umpires column (nobody assigned).	[ ] Pass [ ] Fail	
2.3	**C**	Games	*Cue: After 2.2* Press Print schedule. When the print view appears, close it without printing.	A printable schedule opens, with games grouped by day. Nothing prints.	[ ] Pass [ ] Fail	
2.4 ★	**C**	Games	*Cue: After 2.2* Assign Liam Smith (youth) as the plate umpire of this game: 9:00 AM, A division, A-Yankees vs A-Dodgers, Roy Cloud Elementary. Use that game's assign button in the Actions column, choose Liam Smith for Plate, and save.	The game now shows Liam Smith and is no longer OPEN. If the screen shows eligibility notes for youth, Liam is allowed (he is 14).	[ ] Pass [ ] Fail	
2.5	**C**	Games	*Cue: After 2.4* Assign Michael Chang as the plate umpire of this game: 9:00 AM, AA division, Bechet Field. (He already has the Majors game at 12:30 PM: that is fine.)	Michael Chang appears on the 9:00 AM AA game at Bechet Field. No overlap warning (his seeded games that day are at 12:30 PM and 5:00 PM).	[ ] Pass [ ] Fail	
2.6 ★	**F**	Home, then My schedule	*Cue: After 2.4 (Scheduler says 'assigned')* Sign in as Liam. Find your new game on Saturday Nov 14 and press Confirm.	You see Saturday, 9:00 AM, A-Yankees vs A-Dodgers at Roy Cloud Elementary, marked Assigned. After Confirm it says Confirmed.	[ ] Pass [ ] Fail	
2.7	**E**	Home, then My schedule	*Cue: After 2.5* Sign in as Michael Chang. You now have three games on Nov 14 (9:00 AM, 12:30 PM and 5:00 PM). Press Confirm on the 9:00 AM game ONLY. Leave the other two alone.	The 9:00 AM game says Confirmed. The 12:30 PM and 5:00 PM games still say Assigned (not confirmed).	[ ] Pass [ ] Fail	
2.8	**E**	Home, then Games you can take	*Cue: After 2.7* Set From to 2026-11-21 and take any one open game (press Take).	The game moves into My schedule on Saturday Nov 21.	[ ] Pass [ ] Fail	
2.9	**E**	Home, then My availability	*Cue: After 2.8* Press Add and mark yourself unavailable (I can't) for Sunday 2026-11-22. Then press Remove to take it off again.	The entry appears in your availability list, and disappears after Remove.	[ ] Pass [ ] Fail	
2.10	**C**	Games	*Cue: After 2.8* Look at Saturday Nov 21 and find the game Michael Chang took.	His name is on that game.	[ ] Pass [ ] Fail	
2.11	**A**	Supabase SQL Editor	*Cue: After 2.7* Run the assignments check below.	In addition to the 17 seeded rows you see Liam Smith (plate, 9:00, confirmed) and Michael Chang's new plate game at 9:00 (confirmed), next to his seeded plate games at 12:30 and 17:00 (both assigned).	[ ] Pass [ ] Fail	

#	Who	Where	What to do	What you should see	Result	Notes

DB	**DATABASE CHECK (read-only). Section 2.x of testday_db_checks.sql. Select the query and press Run.**
	`-- who is assigned on Nov 14 (run after steps 2.4 to 2.8, and any time)`
	`select (g.starts_at at time zone 'America/Los_Angeles')::time as local_start, u.display_name, a.position, a.status, a.attendance, a.self_assigned`
	`from public.game_assignments a join public.games g on g.id = a.game_id join public.umpires u on u.id = a.umpire_id`
	`where (g.starts_at at time zone 'America/Los_Angeles')::date = '2026-11-14'`
	`order by 1, 3;`
	`-- Before Phase 2 there are 17 rows. After Phase 2 you also see Liam Smith (plate, 9:00) and Michael Chang's new plate game at 9:00,`
	`-- on top of his two seeded games (plate 12:30 and plate 17:00): 19 rows in all.`					

Phase 3: A younger umpire needs a parent's consent Sam Young is 11. The system must refuse until his mother consents. About 15 minutes.						
3.1 ★	**C**	Games	*Cue: Phase 3 begins* Try to assign Sam Young (age 11) as the plate umpire of this game: 11:00 AM, A division, A-Mets vs A-Phillies, Kennedy Middle School.	The system REFUSES with a message like: That umpire is under 13 and needs a parent or guardian's consent before they can be assigned. The game is unchanged.	[ ] Pass [ ] Fail	
3.2	**B**	Families	*Cue: After 3.1* Find Sam Young's card and the Needs attention list.	Sam shows a Waiting for consent badge and Maria Smith is listed as his mother with 'no consent yet'. Needs attention says he needs a parent's consent before he can be assigned.	[ ] Pass [ ] Fail	
3.3 ★	**G**	My family	*Cue: After 3.2* Sign in as Maria. Read about both children. Under Sam Young read the consent wording, then press I give consent.	You see Liam (age 14, Active, with his Nov 14 game) and Sam Young (age 11, Waiting for consent). The wording says it is DEMO wording for testing. After you press the button: Thank you. Your consent for Sam Young is recorded. Sam's box now says you gave consent and offers Withdraw consent.	[ ] Pass [ ] Fail	
3.4 ★	**C**	Games	*Cue: After 3.3 (Parent says 'consent given')* Try again: assign Sam Young as the plate umpire of: 11:00 AM, A division, A-Mets vs A-Phillies, Kennedy Middle School.	It now works. The game shows Sam Young.	[ ] Pass [ ] Fail	
3.5	**G**	My family	*Cue: After 3.4* Reload the page and look at the games under each child.	Liam's Nov 14 game is listed (Confirmed). Sam Young's 11:00 AM game at Kennedy Middle School is listed as Assigned.	[ ] Pass [ ] Fail	
3.6	**A**	Supabase SQL Editor	*Cue: After 3.4* Run the check below.	One row: Sam Young, Maria Smith, text_version 2026-11-demo, not withdrawn.	[ ] Pass [ ] Fail	

DB	**DATABASE CHECK (read-only). Section 3.6 of testday_db_checks.sql. Select the query and press Run.**
	`-- consent`
	`select u.display_name as child, p.display_name as parent, c.text_version, c.given_at, c.withdrawn_at`
	`from public.parental_consents c join public.umpires u on u.id = c.umpire_id join public.profiles p on p.id = c.parent_id`
	`order by c.given_at;`
	`-- After step 3.3: one row, Sam Young / Maria Smith / 2026-11-demo, not withdrawn.`					

#	Who	Where	What to do	What you should see	Result	Notes
3.7	**A**	Supabase SQL Editor, then your inbox	*Cue: After 3.5* Run the sender (see 0.4). Then run the email queue check and look in your inbox.	Messages marked [TEST for ...] arrive: Liam's assignment, 'Copy for Liam Smith: ...' for his mother's address (parent1@rwcll.test), and 'Copy for Sam Young: ...' for Maria (Sam has no email of his own). Read them out loud. They should be clear and contain no secrets.	[ ] Pass [ ] Fail	

DB	**DATABASE CHECK (read-only). Section mail of testday_db_checks.sql. Select the query and press Run.**
	`-- the email queue (newest first; run it at any time)`
	`select created_at at time zone 'America/Los_Angeles' as local_time, status, to_email, left(subject, 90) as subject, last_error`
	`from public.email_outbox order by created_at desc limit 40;`
	`-- status 'queued' = waiting for the sender; 'sent' = sent to YOUR inbox (because of safe mode); 'failed' shows why.`					

The script, Session 2

Session 2: Game day and after

The day before, game day, the reports, payroll, and the later changes (consent withdrawn, turning 18), then the things that must not work. About 2 hours. Everyone takes part.

#	Who	Where	What to do	What you should see	Result	Notes
Phase 4: The day before (pretend Friday Nov 13) Reminders go out, and parents are copied. About 15 minutes.						
CLOCK: Everyone sets pretend time to Fri 11/13/2026, 9:00 AM.						
4.0a ★	**A**	Supabase SQL Editor (TEST project)	*Cue: Before everyone joins Session 2* SESSION 2 STARTS HERE. If Session 1 was on another day, first check that email is still in safe mode and the database was not cleaned up. Run the check below. (If you are running back to back, run it anyway: it takes a minute.)	Every row shows n equal to expected: Liam and Michael assigned, Sam Young's consent and assignment, Rita Miller linked, the new Test umpire approved, and safe mode on. If a row is wrong, a Session 1 step did not happen: do that step by hand now (the person named in the row has it on their sheet), then run this again.	[ ] Pass [ ] Fail	

DB	**DATABASE CHECK (read-only). Section 4.0a of testday_db_checks.sql. Select the query and press Run.**
	`-- SESSION 2 STARTING CHECK (the results of Session 1 must still be there)`
	`select 'Liam Smith is the plate umpire of a Nov 14 game' as what, count(*) as n, 1 as expected`
	`from public.game_assignments a join public.games g on g.id = a.game_id join public.umpires u on u.id = a.umpire_id`
	`where u.display_name = 'Liam Smith (Youth)' and a.position = 'plate' and (g.starts_at at time zone 'America/Los_Angeles')::date = '2026-11-14'`
	`union all select 'Michael Chang has three Nov 14 games (9:00 new, 12:30 and 17:00 seeded)', count(*), 3`
	`from public.game_assignments a join public.games g on g.id = a.game_id join public.umpires u on u.id = a.umpire_id`
	`where u.display_name = 'Michael Chang' and (g.starts_at at time zone 'America/Los_Angeles')::date = '2026-11-14'`
	`union all select 'Sam Young has his mother''s consent', count(*), 1`
	`from public.parental_consents c join public.umpires u on u.id = c.umpire_id where u.display_name = 'Sam Young' and c.withdrawn_at is null`
	`union all select 'Sam Young is assigned to a Nov 14 game', count(*), 1`
	`from public.game_assignments a join public.games g on g.id = a.game_id join public.umpires u on u.id = a.umpire_id`
	`where u.display_name = 'Sam Young' and (g.starts_at at time zone 'America/Los_Angeles')::date = '2026-11-14'`
	`union all select 'Rita Miller is approved and linked to Oliver Miller', count(*), 1`
	`from public.family_links l join public.umpires u on u.id = l.umpire_id join public.profiles p on p.id = l.parent_id`
	`where u.display_name = 'Oliver Miller' and p.display_name = 'Rita Miller' and p.account_status = 'approved' and l.ended_at is null`
	`union all select 'the new Test umpire is approved', count(*), 1`
	`from public.profiles where display_name like 'Test %' and account_status = 'approved'`
	`union all select 'email is in safe mode', count(*), 1`
	`from public.sending_settings where key = 'email_mode' and value = 'safe';`
	`-- Every row: n = expected. A row that is wrong means a Session 1 step did not happen (or the test was cleaned up`
	`-- between sessions): do that step quickly by hand (it is on the sheet of the person named in the row), then run this again.`			

4.0b	**ALL**	Your own device	*Cue: After 4.0a* Open the TEST site and sign in with your login (if you were in Session 1 and are still signed in, just check). Look at your tabs. If you were not in Session 1, read page 1 of your sheet first.	You are signed in and your tabs match your sheet. The Treasurer, who skipped Session 1, does steps 0.6 and 0.7 here instead (sign in, then try the pretend time bar).	[ ] Pass [ ] Fail	
4.1	**A**	Supabase SQL Editor	*Cue: Phase 4 begins* Run the count check below.	15 assignments are waiting for a reminder.	[ ] Pass [ ] Fail	

#	Who	Where	What to do	What you should see	Result	Notes

DB	**DATABASE CHECK (read-only). Section 4.1 of testday_db_checks.sql. Select the query and press Run.**
	`-- how many reminders to expect`
	`select count(*) as assignments_to_remind`
	`from public.game_assignments a join public.games g on g.id = a.game_id`
	`where g.status = 'scheduled' and a.reminded_at is null`
	`  and g.starts_at >  '2026-11-13 09:00:00-08'::timestamptz + interval '20 hours'`
	`  and g.starts_at <= '2026-11-13 09:00:00-08'::timestamptz + interval '28 hours';`
	`-- 15: the 12 seeded assignments on games that start by 1:00 PM, plus Liam, Michael Chang's new 9:00 game and Sam Young.`
	`-- (The 5 seeded assignments on the games at 3:30 PM and 5:00 PM are outside the reminder window, so they wait.)`					

4.2 ★	**A**	Supabase SQL Editor	*Cue: After 4.1* ACTION (changes data): in testday_actions.sql run ONLY section 4.2. It queues the reminders as if it were Friday Nov 13 at 9:00 AM.	It returns 15. If you run it a second time it returns 0 (nobody is reminded twice).	[ ] Pass [ ] Fail	

DB	**ACTION: THIS CHANGES DATA. It is section 4.2 of testday_actions.sql: run only this section, only at this step.**
	`-- ACTION: queue the day-before reminders as if it were Fri Nov 13, 9:00 AM`
	`select public.queue_game_reminders(p_now := '2026-11-13 09:00:00-08'::timestamptz) as reminders_queued;`
	`-- Should equal the number from the check in step 4.1 (15). Running it a second time returns 0 (nobody is reminded twice).`					

4.3 ★	**A**	PowerShell, then your inbox	*Cue: After 4.2* Run the sender (see 0.4). Run it a SECOND time, because it sends at most 20 messages each run. Then read the new emails out loud.	'Reminder: you umpire tomorrow' for Liam and Michael Chang, and 'Copy for ...' reminders for the parents of the youth umpires. Michael's 12:30 PM reminder also says he has not confirmed that game yet and asks him to. (His 5:00 PM game is not reminded yet: it is more than 28 hours away.) None contains a gate code or other private detail.	[ ] Pass [ ] Fail	
4.4	**G**	Your imagination, with the facilitator	*Cue: After 4.3* Listen while the facilitator reads out the 'Copy for Liam Smith' and 'Copy for Sam Young' emails. Would you understand them? Would you want more or fewer?	There is nothing to press. Write your honest reaction on your notes page.	[ ] Pass [ ] Fail	
4.5	**F**	Your imagination, with the facilitator	*Cue: After 4.3* Listen while the facilitator reads Liam's own reminder. Would a 14-year-old understand it?	There is nothing to press. Write down your reaction.	[ ] Pass [ ] Fail	
Phase 5: Game day (pretend Saturday Nov 14) Check-in, running late, a no-show, a replacement, notes, and a rainout. About 30 minutes.						
CLOCK: Everyone sets pretend time to Sat 11/14/2026, 7:30 AM to start. Steps say when to move your clock forward.						
5.1 ★	**F**	Home, then your game on Saturday Nov 14	**CLOCK: Sat 11/14 7:30 AM** *Cue: Phase 5 begins* Set pretend time to Sat 2026-11-14, 7:30 AM. Look at your 9:00 AM game for a check-in button.	There is NO I'm here button yet (check-in opens one hour before the game, at 8:00 AM).	[ ] Pass [ ] Fail	

#	Who	Where	What to do	What you should see	Result	Notes
5.2	**F**	Home, then your game	**CLOCK: Sat 11/14 8:30 AM** *Cue: After 5.1* Set pretend time to 8:30 AM. Look for the button that says you are running late and press it (choose about 10 minutes if asked).	The app thanks you / confirms, and your game shows that you reported running late.	[ ] Pass [ ] Fail	
5.3	**B**	Field board	**CLOCK: Sat 11/14 8:30 AM** *Cue: After 5.2* Set pretend time to 8:30 AM, open the Field board for Saturday Nov 14, press Refresh, and find the Roy Cloud Elementary 9:00 AM game.	Liam Smith shows as running late.	[ ] Pass [ ] Fail	
5.4 ★	**F**	Home, then your game	**CLOCK: Sat 11/14 8:50 AM** *Cue: After 5.3* Set pretend time to 8:50 AM. Press I'm not late after all, then press I'm here.	Your game shows that you arrived at about 8:50, on time.	[ ] Pass [ ] Fail	
5.5	**B**	Field board	**CLOCK: Sat 11/14 8:55 AM** *Cue: After 5.4* Press Refresh.	Liam Smith shows Arrived at about 8:50 and is no longer shown as running late.	[ ] Pass [ ] Fail	
5.6 ★	**E**	Home, then My schedule	**CLOCK: Sat 11/14 8:00 AM** *Cue: After 5.1* Set pretend time to Sat 8:00 AM. Decline your 9:00 AM game at Bechet Field: press Decline, then Decline this game.	The game is no longer yours (it shows as declined) and your 12:30 PM and 5:00 PM games are still yours.	[ ] Pass [ ] Fail	
5.7 ★	**B**	Field board	**CLOCK: Sat 11/14 8:05 AM** *Cue: After 5.6 (Adult umpire says 'I declined')* Set pretend time to Sat 8:05 AM. Find the 9:00 AM Bechet Field game: it now needs an umpire. Press Find an umpire. Pick William Anderson (an adult umpire) if he is not marked Busy at this time, and press Assign.	The call-around list shows umpires with their phone numbers and marks the busy ones. After Assign, the game shows William Anderson.	[ ] Pass [ ] Fail	
5.8	**B**	Field board	**CLOCK: Sat 11/14 9:12 AM** *Cue: After 5.7* Set pretend time to Sat 9:12 AM. William 'arrives' 12 minutes late: press Arrived next to William Anderson. Check the time offered is 9:12, then save.	He is shown as Arrived at 9:12, marked late (the game started at 9:00).	[ ] Pass [ ] Fail	
5.9	**C**	Field board or Games, on the 9:00 AM Roy Cloud Elementary game	*Cue: After 5.4* Add TWO notes to that game. First: TEST: Park behind the gym (leave Administrators only UNticked). Second: TEST: Coach argued last week, admins only (tick Administrators only). Save each.	Both notes are saved. The second is marked Administrators only.	[ ] Pass [ ] Fail	
5.10 ★	**F**	Home, then your game	*Cue: After 5.9* Reload and look at the notes on your 9:00 AM game.	You can see the first note (parking). You must NOT see the second one (administrators only).	[ ] Pass [ ] Fail	

#	Who	Where	What to do	What you should see	Result	Notes
5.11 ★	**C**	Field board	**CLOCK: Sat 11/14 10:15 AM** *Cue: After 5.8* Set pretend time to Sat 10:15 AM. Use the close-a-field form: Field Kennedy Middle School, From 10:30 AM, To 6:00 PM, Reason TEST: rain. Press the button that lists the games it will cancel, check the list, then press Cancel these games.	The list shows ONE game: 11:00 AM A-Mets vs A-Phillies (Sam Young's game). After you confirm, that game shows as canceled and the field shows Closed today.	[ ] Pass [ ] Fail	
5.12	**G**	My family	*Cue: After 5.11* Reload and look at Sam Young's games.	Sam's 11:00 AM game now shows Game canceled.	[ ] Pass [ ] Fail	
5.13	**E**	Home, then My schedule	**CLOCK: Sat 11/14 12:20 PM** *Cue: After 5.11* Set pretend time to Sat 12:20 PM. For your 12:30 PM Majors game at Mitchell Field press I'm here.	It records your arrival at about 12:20, on time.	[ ] Pass [ ] Fail	
5.14	**B**	Field board	**CLOCK: Sat 11/14 12:30 PM** *Cue: After 5.13* Reopen the Kennedy Middle School field (the Reopen button). Then press Print this day and close the print view without printing.	The 11:00 AM A-Mets vs A-Phillies game goes back to scheduled and the Closed today label goes away. The print view shows the day's games.	[ ] Pass [ ] Fail	
5.15	**C**	Games	*Cue: After 5.14* Press Download CSV and open the file.	A spreadsheet downloads with one line per game and its umpires.	[ ] Pass [ ] Fail	
5.16 ★	**A**	Supabase SQL Editor, PowerShell, your inbox	*Cue: After 5.15* Run the check below. Then run the sender and read out the new emails.	Arrivals: Liam about 8:50, William about 9:12 (late), Michael about 12:20. Two notes (one admin only). One running-late report. The closure shows reopened. At least one email for the canceled game, including a 'Copy for Sam Young' for his mother. Others are possible (running late, a declined game, a reopened field): write down which of those events sent an email and which sent nothing.	[ ] Pass [ ] Fail	

DB

Phase 7: Payroll (no real money) Earnings from last month's real seeded games, a payroll, approval, and recording a payment. About 25 minutes.						
CLOCK: Everyone: press Use real time. Payroll uses the earlier games already in the system.						

#	Who	Where	What to do	What you should see	Result	Notes
7.1	**D**	Payments, then Pay rates	**CLOCK: Real time** *Cue: Phase 7 begins (everyone: press Use real time first)* Look at the rates. Do not change anything.	Youth Home plate $50.00 and Youth Field $25.00 in every division. The Adult table is empty: adults are not paid.	[ ] Pass [ ] Fail	
7.2 ★	**D**	Payments, then Earnings	*Cue: After 7.1* Set From to 2026-09-01 and Through to 2026-10-31. Press Work out earnings.	Added 127 earnings ($5,475.00). 97 recorded arrivals earned nothing because that place has no pay rate (adults and the bases). The list shows the earnings.	[ ] Pass [ ] Fail	
7.3	**D**	Payments, then Earnings	*Cue: After 7.2* Add two adjustments. First: umpire Sebastian Wilson, amount 10, reason TEST substitute game. Second: umpire Liam Smith (Youth), amount -5.50, reason TEST lost whistle.	Both are listed. The summary reads 127 earnings, $5,475.00, and adjustments of $4.50.	[ ] Pass [ ] Fail	
7.4 ★	**D**	Payments, then Payroll	*Cue: After 7.3* Set Period starts 2026-09-01, Period ends 2026-10-31, Note TEST Sept to Oct. Press Create a payroll.	A draft appears with Total $5,479.50, a payment for each family, and a red warning: 2 umpires have no payee yet: Elijah Davis ($300.00) and Oliver Miller ($275.00).	[ ] Pass [ ] Fail	
7.5 ★	**D**	Payroll	*Cue: After 7.4* Press Approve payroll (and confirm).	It is REFUSED: Could not approve. These umpires have no payee yet: Elijah Davis, Oliver Miller. The payroll stays a draft.	[ ] Pass [ ] Fail	
7.6	**D**	Payments, then Who is paid	*Cue: After 7.5* Set Elijah Davis's payee to Chris Brown and Oliver Miller's payee to Rita Miller (the account B approved in Phase 1). Save each.	Saved the payee for each. Both lose their 'needs a payee' flags and the count at the top drops by two.	[ ] Pass [ ] Fail	
7.7 ★	**D**	Payments, then Payroll	*Cue: After 7.6* Open the draft and press Approve payroll (confirm the $5,479.50).	Approved: waiting to be paid. The payments list shows 10 families: Maria Smith $244.50, Dana Johnson $450.00, Chris Brown $875.00, Rosa Garcia $275.00, Rita Miller $275.00, Pat Nguyen $700.00, Lee Kim $450.00, Sue Patel $685.00, Tom Reyes $700.00, Ana Silva $825.00.	[ ] Pass [ ] Fail	
7.8 ★	**D**	Payroll	*Cue: After 7.7* In the payments list find Maria Smith. Choose Check, type TEST-1001 as the reference, and press Record as paid.	Maria Smith's line says Paid by check (TEST-1001). The other lines still say pending, and the payroll still says Approved: waiting to be paid.	[ ] Pass [ ] Fail	
7.9 ★	**G**	My family	*Cue: After 7.8* Reload and look at Payments to you, and at Liam's Earnings.	Paid to you so far: $244.50 and a line Paid by check. Liam's earnings are listed. (His individual lines may still say 'Approved: payment coming' until every family is paid: write down whether that confuses you.)	[ ] Pass [ ] Fail	
7.10	**D**	Payroll	*Cue: After 7.8* Press Download spreadsheet (CSV) and open the file.	A file downloads with one line per umpire: the payee, games, earned, adjustments, total, and payment status (Maria's says paid, check, TEST-1001).	[ ] Pass [ ] Fail	

#	Who	Where	What to do	What you should see	Result	Notes
7.11	**ALL**	STRIPE PLACEHOLDER: nothing to press	*Cue: After 7.10* In the real system, this is where each parent would press Set up payments (a Stripe screen) and where the treasurer would send the approved money through Stripe. It is NOT built yet. Write down: where would you expect to find it, what would you want to see, and what would worry you about being paid this way?	Nothing happens. Your notes are the result.	[ ] Pass [ ] Fail	
7.12 ★	**A**	Supabase SQL Editor	*Cue: After 7.10* Run the earnings, payroll and reconciliation checks below.	127 earnings = $5,475.00. The payroll is approved. Payroll total = payments total = items total = $5,479.50, and lines_without_payee = 0. The money log lists every step.	[ ] Pass [ ] Fail

Phase 8: Families, later

Consent withdrawn, and a youth turning 18. About 15 minutes.

#	Who	Where	What to do	What you should see	Result	Notes
8.1	**G**	My family	*Cue: Phase 8 begins* Press Withdraw consent under Sam Young and confirm.	Sam shows Waiting for consent again and the message says your consent is withdrawn.	[ ] Pass [ ] Fail	

#	Who	Where	What to do	What you should see	Result	Notes
8.2 ★	**C**	Games	*Cue: After 8.1* Try to assign Sam Young as the plate umpire of: 11:00 AM, A division, A-Cardinals vs A-Athletics, Orion School.	REFUSED again with the consent message.	[ ] Pass [ ] Fail	
8.3	**A**	PowerShell, then your inbox	*Cue: After 8.2* Run the sender and read out the new email.	'Consent withdrawn for Sam Young', addressed to the administrators (it arrives with [TEST for ...]), saying he cannot be assigned until consent is given again.	[ ] Pass [ ] Fail	
8.4 ★	**A**	Supabase SQL Editor	*Cue: After 8.3* ACTION (changes data): in testday_actions.sql run ONLY section 8.5. It makes Casey Turner turn 18 today and runs the daily birthday job.	The job returns 1 (Casey Turner). (If it says more than 1, a seed umpire had already turned 18: look at the family log.)	[ ] Pass [ ] Fail	

DB	**ACTION: THIS CHANGES DATA. It is section 8.5 of testday_actions.sql: run only this section, only at this step.**
	`-- ACTION: Casey Turner turns 18 today, then the daily job runs`
	`update public.umpire_private_details`
	`set birth_date = ((now() at time zone 'America/Los_Angeles')::date - interval '18 years')::date`
	`where umpire_id = '20000000-0000-0000-0000-000000000033';`
	`select public.convert_turned_18() as umpires_changed;`
	`-- 1.  (If it says more than 1, a seed umpire had already turned 18: look at the family log below.)`					

8.5	**B**	Families	*Cue: After 8.4* Reload and look for Casey Turner and the Recent activity list.	Casey Turner is no longer in the Youth umpires list. Recent activity says Casey Turner (age 18) is now an adult umpire; guardian links ended, by The system.	[ ] Pass [ ] Fail	
8.6 ★	**A**	PowerShell, then your inbox	*Cue: After 8.4* Run the sender and read out the new emails.	THREE messages: to Casey's mother (Pat Nguyen, parent6@rwcll.test): Casey Turner is now an adult umpire (she will no longer be copied, payments go to Casey directly). To Casey (casey.turner@rwcll.test): You are now an adult umpire: please set up your payment account (mentions Stripe). To administrators: 1 umpire turned 18 and became adult umpires.	[ ] Pass [ ] Fail	
8.7	**A**	Supabase SQL Editor	*Cue: After 8.6* Run the check below.	Casey Turner is an adult, with no payee set (an adult is paid to themselves), the adult_umpire role, and 0 active parent links. The family log shows the change made by The system.	[ ] Pass [ ] Fail	

DB	**DATABASE CHECK (read-only). Section 8.9 of testday_db_checks.sql. Select the query and press Run.**
	`-- after Casey turns 18`
	`select u.display_name, u.classification, u.payee_profile_id,`
	`       (select string_agg(ur.role_id, ', ') from public.user_roles ur where ur.user_id = u.profile_id) as roles,`
	`       (select count(*) from public.family_links l where l.umpire_id = u.id and l.ended_at is null) as active_parent_links`
	`from public.umpires u where u.display_name = 'Casey Turner';`
	`-- adult / no payee set (an adult is paid to themselves) / adult_umpire / 0 active parent links.`
	
	`select acted_at at time zone 'America/Los_Angeles' as local_time, actor_name, action, left(detail, 100) as detail`					

#	Who	Where	What to do	What you should see	Result	Notes
			`from public.family_log order by acted_at desc limit 25;` `-- Includes "Casey Turner (age 18) is now an adult umpire; guardian links ended" by "The system", and the consent given and withdrawn.`			
Phase 9: Things that must NOT work Each person tries to open a page they should not be able to. About 10 minutes.						
9.1 ★	**F**	The address bar	*Cue: Phase 9 begins* At the end of the web address type #/payments and press Enter. Then try #/reports and #/families.	You do NOT get a Payments, Reports or Families page. You stay on your own pages.	[ ] Pass [ ] Fail	
9.2 ★	**E**	The address bar	*Cue: Phase 9 begins* Try #/payments, #/reports, #/families and #/games the same way.	None of them shows a page.	[ ] Pass [ ] Fail	
9.3 ★	**G**	The address bar	*Cue: Phase 9 begins* Try #/families, #/payments, #/games and #/reports. Then look at My family again.	None shows a page. My family shows only Liam and Sam Young: no other family's child.	[ ] Pass [ ] Fail	
9.4 ★	**C**	The address bar	*Cue: Phase 9 begins* Try #/reports and #/payments.	Neither shows a page. You have no Reports or Payments tab.	[ ] Pass [ ] Fail	
9.5 ★	**B**	The address bar	*Cue: Phase 9 begins* Try #/payments.	It does not show a page. You have no Payments tab.	[ ] Pass [ ] Fail	
9.6 ★	**D**	The address bar	*Cue: Phase 9 begins* Try #/games, #/families and #/reports.	None of them shows a page. You only have Payments and My details.	[ ] Pass [ ] Fail	
9.7	**A**	Supabase SQL Editor	*Cue: Phase 9 begins* Look at the email queue one more time.	Every message was sent to YOUR address (marked [TEST for ...]). No real person received anything from the app today.	[ ] Pass [ ] Fail	

DB	**DATABASE CHECK (read-only). Section mail of testday_db_checks.sql. Select the query and press Run.**
	`-- the email queue (newest first; run it at any time)`
	`select created_at at time zone 'America/Los_Angeles' as local_time, status, to_email, left(subject, 90) as subject, last_error`
	`from public.email_outbox order by created_at desc limit 40;`
	`-- status 'queued' = waiting for the sender; 'sent' = sent to YOUR inbox (because of safe mode); 'failed' shows why.`					

Phase 10: Wrap-up Everyone writes down what they thought. About 10 minutes.						
10.1	**ALL**	Your notes page	*Cue: Phase 10 begins* Fill in the Notes and problems page: the three most confusing moments, anything that did not work, and one thing that worked well. Give a score from 1 (I would not trust it) to 5 (I would use it next season).	A completed page. Be honest: nothing here is a test of you.	[ ] Pass [ ] Fail	

#	Who	Where	What to do	What you should see	Result	Notes
10.2	**A**	Video call	*Cue: After 10.1* Go around the call: each person reads their score and their top confusing moment. Collect the pages. Count how many MUST-PASS steps (marked in bold with a star) failed.	A written list of problems, ordered by how many people hit them.	[ ] Pass [ ] Fail	
10.3	**A**	Supabase SQL Editor (TEST only)	*Cue: After 10.2* If you will run the test again: run testday_cleanup.sql, then the starting-state check (0.2). Also delete the test accounts people created by signing up (Supabase: Authentication, Users).	The starting-state check is correct again.	[ ] Pass [ ] Fail	

Sending the emails by hand

The app sends email by itself about every 5 minutes. For the test, the facilitator runs the sender by hand so messages arrive when announced. Run this in PowerShell (use the TEST project reference below and your own SENDER_SECRET; never paste the secret anywhere else):

```
Invoke-RestMethod -Method Post -Uri "https://mucsujjpfefrfxystxse.supabase.co/functions/v1/send-outbox" -Headers @{"x-sender-secret"="<YOUR SENDER_SECRET>"}
```

It answers with what it did, for example sent: 18. It sends at most 20 messages per run, so run it again if the queue still shows queued messages. Because safe mode is on, every message goes to the redirect address you set in step 0.3.

If something goes wrong during the test

- Nobody can sign in: check the TEST site address, and that the seed ran (step 0.1).
- An expected email does not arrive: run the sender again, then run the email queue check (look at status and last_error).
- A screen looks wrong or loads forever: note the step, tell everyone to carry on, and look at it afterwards.
- Someone changed something they should not have: note it; after the whole test run testday_cleanup.sql and re-run the starting-state check. (Not between the two sessions.)
- A step cannot work because an earlier step failed: skip it, mark it Skipped, and continue.

Notes and problems (the facilitator's combined list)

Write one line for each problem. Blocker = I could not continue. Annoying = it worked but was confusing or slow. Idea = something that would help.

Step #	What happened, or what confused you	Blocker / Annoying / Idea	Who saw it too?

My score, from 1 (I would not trust it) to 5 (I would happily use it next season): _____

The three most confusing moments:

1. _____
2. _____
3. _____

One thing that worked well: _____
